

**REMARKS**

By this amendment, Claims 1-21 are pending with Claims 4-13 and 15-20 withdrawn.

In the Office Action of February 7, 2006, the Examiner indicated Claims 1-3 were allowed and Claim 14 was rejected as being obvious over U.S. Patent 5,100,242 (Latto). Reconsideration of this rejection, in view of amendments to Claim 14 is respectfully requested.

Claim 14 now recites that the vortex generator has a housing and the actuator is within the housing. As seen in Figure 11 of Latto, the actuator 8 is outside of the housing holding diaphragm 10. Also, new claim 21 recites that the orifice leads to the ambient atmosphere. In contrast, the orifice 7 of Latto extends from the primary chamber 13 to the container 20 which contains fluid 25.

Claim 14 is allowable over the prior art and generic so that the restriction requirement regarding Claims 15-20 should be withdrawn and the Claims allowed to issue. In addition, reconsideration of the withdrawal of claim 8 is respectfully requested, as the claim recites the same actuator as allowed claim 1.

If any fees are due and owing, the Commissioner is authorized to charge Deposit Account 08-2455.

Respectfully submitted,

Christopher J. McDonald
